I have directed the EPA ERRS contractor to work with NTUA on water delivery issues. They have been in contact with the director of NTUA and are working out the logistics as we speak. As I get more information on that, I will pass it along. I am going to start using the Bulletin function on the Region 9 Gold King web site to send updates as needed.

FYI

Not sure you all saw this, but following press release issued yesterday:

NAVAJO TRIBAL

An Enterprise of

For Immediate Release

NTUA CONTINUES MONIT

Fort Defiance, AZ. — The Navajo Tribal Utility Agency has been monitoring the water quality of the San Juan River in the Four Corner area of the Navajo Nation. The agency has been working with State and Federal agencies regarding the water quality of the San Juan River. The agency has been monitoring the water quality of the San Juan River for the past several years. The agency has been working with State and Federal agencies regarding the water quality of the San Juan River. The agency has been monitoring the water quality of the San Juan River for the past several years.

Since the notification, NTUA has remained in close contact with the Navajo Nation Environmental Protection Agency. Officials emphasize that there is no threat to the drinking water system in the northern New Mexico part of the Navajo Nation. The agency has been monitoring the water quality of the San Juan River for the past several years.

We will look at it. Not sure it makes sense to ask people to bring in samples. Chain of custody issues. Better to do it like region 8 is doing it. Go to folks that request it. but what do I know.
